Dear Hiring Manager,

I am writing to express my enthusiasm for the Full Stack Developer position at your organization, as advertised on Job Portal. With hands-on experience across frontend and backend technologies, along with a strong foundation in web development, I am confident in my ability to contribute effectively to your team.

Currently, I am a Full-Time Frontend Developer at Meask, where I work extensively with React.js, Tailwind CSS, Material UI, and Redux Toolkit to build responsive and scalable user interfaces. My role involves ensuring seamless UI/UX experiences by collaborating closely with designers and backend developers. Additionally, I manage deployment pipelines using AWS CodePipeline, AWS EC2, and AWS S3, optimizing performance and scalability. I also have experience bundling React code into APKs using TWA and Capacitor.js and successfully deploying apps to the Google Play Store.

Previously, as a Web Developer Intern at TXON, I developed an Admin Dashboard using React.js for the user interface, Express.js for API management, and Mongoose ODM for data storage. I implemented JWT-based authentication with role-based access and streamlined file uploads via Multer and Cloudinary, significantly enhancing application security and data handling.

At InternPe, where I worked as a Python Developer Intern, I developed a notes application using Django and Django Rest Framework. I created RESTful APIs to support CRUD operations and facilitate efficient frontend-backend interactions. This experience reinforced my understanding of backend data structures while emphasizing robust, scalable code practices.

I am highly motivated to bring my expertise in full-stack development, API design, responsive UI implementation, and cloud-based deployment to your team. Thank you for considering my application, and I look forward to discussing how my background aligns with your organization's goals.

Sincerely,  
Raj Diwate
