Dear Hiring Manager,

I am writing to express my enthusiasm for the Full Stack Developer position at your organization, as advertised on Job Portal. With hands-on experience across frontend and backend technologies, along with a strong foundation in web development, I am confident in my ability to contribute effectively to your team.

At Meask, I am responsible for contributing across the full stack, encompassing frontend, backend, and DevOps. On the frontend, I worked extensively with React.js, following Atomic Design principles to build modular components, writing tests and Storybook stories, and leveraging RTK Query and MUI for efficient state management and styling, while ensuring SEO and performance optimizations. On the backend, my main task was developing Node.js microservices and REST APIs, implementing role-based access control, and adding security features like rate limiting and CORS, while ensuring smooth data flow between services. On the DevOps side, I focus on AWS infrastructure, writing CloudFormation templates, managing multi-account CI/CD pipelines, and deploying microservices with Lambdas, API Gateway, S3, RDS, and SAM.

Previously, as a Web Developer Intern at TXON, I developed an Admin Dashboard using React.js for the user interface, Express.js for API management, and Mongoose ODM for data storage. I implemented JWT-based authentication with role-based access and streamlined file uploads via Multer and Cloudinary, significantly enhancing application security and data handling.

At InternPe, where I worked as a Python Developer Intern, I developed a notes application using Django and Django Rest Framework. I created RESTful APIs to support CRUD operations and facilitate efficient frontend-backend interactions. This experience reinforced my understanding of backend data structures while emphasizing robust, scalable code practices.

I am highly motivated to bring my expertise in full-stack development, API design, responsive UI implementation, and cloud-based deployment to your team. Thank you for considering my application, and I look forward to discussing how my background aligns with your organization's goals.

Sincerely,
Raj Diwate

Raj Diwate

Full Stack developer

Bilingual or Proficient (C2)

Passionate and results-driven Full Stack Developer with expertise in React.js (Atomic Design, RTK Query, MUI, Storybook) and Node.js (REST APIs, microservices, RBAC, security middleware). Skilled in DevOps practices with AWS (Lambdas, API Gateway, S3, RDS, CloudFormation, SAM) and CI/CD automation. Excels at building scalable, secure, and high-performance web applications with a focus on clean architecture and user experience.

Experience

2022-06 - 2022-07

Web Developer Intern
TXON, Remote

- Developed the Landing Page of with React.js, implementing core UI features and managing state with Redux.
- Created responsive layouts forms using Tailwind Css, ensuring a user-friendly experience.
- Enhanced website functionality by optimizing code and implementing new features.

2023-03 - 2023-04

Python Developer Intern
InternPe, Remote

- Developed a notes application using Django and Django Rest Framework.
- Implemented full CRUD operations.
- Designed RESTful APIs to handle data interactions between frontend and backend

2024-12 - Current

Front End Developer
Meask, (Remote)

- Developed **scalable frontends** using **React (Atomic Design, MUI)** with **RTK Query**, ensuring SEO & page performance optimizations, along with **unit tests and Storybook** for component reusability.
- Built and optimized **Node.js microservices**, implementing **REST APIs, role-based access control, rate limiting, CORS, and JWT-based security**.
- Managed **data flow across microservices** ensuring scalability, performance, and clean architecture.
- Automated cloud infrastructure with **AWS CloudFormation & SAM**, deploying microservices on **Lambdas, API Gateway, S3, and RDS**.
- Implemented **multi-account CI/CD pipelines** for efficient, production-ready deployments.

Projects

- [**Chatify**](#) **-** Developed an end-to-end Chat-app. React, Express, Socket.io, Redis, kafka, Postgres, Prisma, Microservices, K8S, Gitops.
- **SilentSender-** Developed a platform for users to exchange anonymous feedbacks. Next.js, PostgreSQL, Lucia Auth, TailwindCss.
- **Ecommerce Service** - Developed a complete backend for an Ecommerce Application. JWT, Nodejs, Expressjs.

Education

Savitribai Phule University,BE | 2020-2024 | GPA:8.6 - Pune
St. John Junior College | GPA: 8.2 | 12th - Nagpur
Gandhi City Public School | GPA: 8.2 | 10th - Nagpur
